## Overview

Do you need an easier way to track user activity? Are you searching for clear answers on system security configuration? Have you been asked about your OnBase license usage?

Naviant's Reporting Dashboards Bundle provides customers with specialized reporting capabilities that are not part of the standard OnBase Reporting Dashboards module.

We have pre-built some of the most commonly requested reports to help our customers gain the efficiencies and visibility they desire within OnBase.

OnBase Administrators and users alike will find the Naviant Reporting Dashboards Bundle easy to use, easy to share, and highly effective in analyzing and tuning your OnBase solution.

## How Does It Work?

Reporting Dashboards resides within your existing OnBase Unity Client environment and provides you the freedom to distribute, modify or add reports.

Additionally, as we continue to build new reports based on customer feedback and our own insights, you will receive access to the updates at no additional cost.

As a value-add to Naviant's Tiered Support Customers, the Naviant Reporting Dashboards Bundle, as well as updates, are included with Naviant Tiered Support Contracts.

## Benefits of Reporting Dashboards Bundle

The Bundle includes endless benefits to our customers and provides a very quick ROI, such as:

- Reduce processing time by using streamlined custom reports
- Leverage report knowledge to improve system configuration
- Easily monitor user activity
- Quickly identify bottlenecks in a process
- Leverage system metrics to enhance system performance
- Access to more than 50 pre-built reports, and this will continue to grow
- Naviant Reporting Dashboards Bundle is free with Tiered Support

---
