TAKE A TOUR OF THE
CONNECTED INSURANCE CARRIER

POLICY
Create end-to-end processes and accelerate results. Increase customer service by having policy information immediately available.

CLAIMS
Digitize and automate customer interactions to ensure timely communication and improve visibility. Automatically manage activity records, notifications and other repetitive, manual tasks, resulting in a measurable reduction of loss adjustment expenses.

BILLING
Streamline repetitive tasks by generating supporting documentation, packages and reconciliations directly from within your core billing system.

DIGITAL MAILROOM
Template free classification and extraction of paper and electronic mail. Documents and information flow faster allowing business processes, and the execution of business decisions, in less time.

AP
Transform your most costly, error-prone AP processes into revenue-generating, value-added operations.

UNDERWRITING
Ensure all required information is available and accessible to make the best decisions possible. Dashboard views, business activity monitoring and analytical data improves underwriting processes.

NEW BUSINESS
Help finance and underwriting see immediate results by providing accelerated receipt of information, increased positive cash flow and improved service level agreements.
